

# VECTOR HARVESTING BELT

The Vector harvesting belt is ideal for automatic harvesting in big boxes. At the end of the harvesting belt we have placed a conveyor belt that automatically distribute the crops over four boxes. As a result, no people are needed inside the harvesting trailer.

Because the changeover time between the harvesting trailers is only 3 minutes, we approach a continuous harvesting process. The harvesting belt is custom made for your harvesting trailers and can be connected plug-and-play to the tractor. It comes into its own when using multiple harvesting trailers so that the harvest can continue after changing the harvesting trailers. Eliminating walking movements and labor will significantly increase your efficiency.

## SPECS

**Length**  
8m - 12m

**Width**  
27cm - 57cm

**Total weight**  
from 125kg

**Efficiency**  
+ 52%

**Capacity**  
11,000kg/hour

For  
big boxes

*Suitable for: Broccoli,  
Cauliflower and Kale.*
